AARAV MEHTA

AI Engineer | RAG, LLM Evaluation, Python and FastAPI Backend

+91 90000 00000 | aarav@example.com | linkedin.com/in/aarav-mehta-example | github.com/aarav-mehta-example | Bengaluru, India

SUMMARY

Software engineer who ships LLM features to production in Python. Built a support assistant with RAG over 1,200 help-center articles on PostgreSQL and pgvector, and the 80-question eval set that gates every prompt or model change. Also built FastAPI webhook services with idempotency and retries, deployed on AWS with Docker.

SKILLS

- **Languages:** Python, SQL, TypeScript, JavaScript
- **AI / ML:** LLM applications, RAG, embeddings, pgvector, Chroma, OpenAI API, eval sets
- **Backend:** FastAPI, REST APIs, webhooks, PostgreSQL, idempotency, retries with backoff
- **Cloud and Infra:** AWS (Lambda, EventBridge, CloudWatch, S3), Docker, GitHub Actions, Airflow, BigQuery
- **Frontend:** React, TypeScript

EXPERIENCE

Software Engineer | Tidewater Systems *Jul 2025 - Present | Hybrid, Bengaluru*

- Shipped an internal support assistant that answers agent questions with RAG over 1,200 help-center articles, using OpenAI embeddings and pgvector in PostgreSQL.
- Wrote an 80-question eval set with expected answers and reran it on every prompt or model change, so only changes that passed went to production.
- Built a FastAPI webhook ingestion service for 6 carrier integrations, with idempotency keys in PostgreSQL to drop duplicate events and retries with exponential backoff.
- Moved 2 cron jobs to AWS Lambda with EventBridge schedules, and added structured JSON logs and CloudWatch alarms.

Data Engineering Intern | Kestrel Analytics *Jan 2025 - Jun 2025 | Remote*

- Built 3 Airflow pipelines that load data from REST APIs into BigQuery, with schema checks before each load.
- Wrote SQL models and a Looker Studio dashboard used in the weekly client report.

PROJECTS

- **DocSift (open source):** PDF question answering with RAG on FastAPI, Chroma and the OpenAI API.
- **TrailMap (2nd place, Example State Hackathon 2024):** route planner for delivery riders, React front end and a Python routing service.

EDUCATION

- **B.Tech, Computer Science and Engineering**, Example Institute of Technology, Bengaluru | Aug 2021 - May 2025 | CGPA 8.4/10
